Statement of Purpose

The website API to a following recommendation system of mastodon(s) by user interests.

Solve the problem of the confuse by a new user to Mastodon of hardly finding contents to follow.
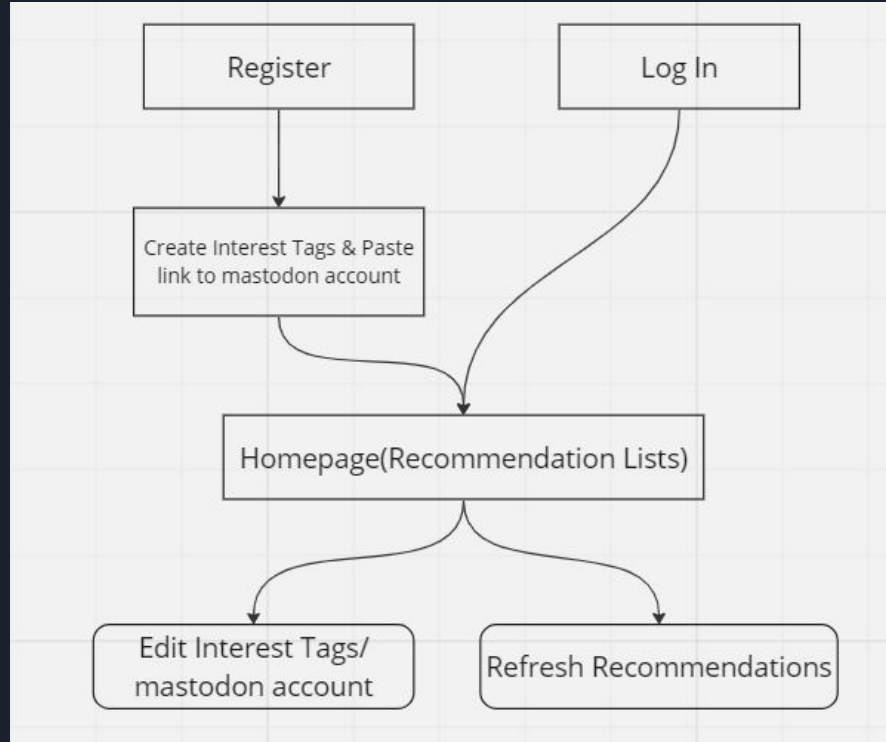

User Personas

Users who:

- Willing to discover new trends and technologies.
- Are new to the area of Mastodon or Fediverse.
- Would like to join the decentralized Fediverse.
- Has broad interests and the desire to explore contents of these interests.

Risks and Rabbit Holes

- Concentrate on the recommendations more than other features.
- Use a website API rather than directly modifying the Mastodon servers.
- No too-specific recommendations algorithms.
- Easy to use, not too fancy website interfaces.
- Take full advantage of existing Mastodon APIs.
